

Manufacturer
BioRad

Model
T100

Thermal Cycler

Technical specifications:

- Single-block that could be used with 96×0.2 ml tubes, 0.2 ml tube strips or one 96-well microplate.
- Working temperature range between 4°C and 100°C.
- Thermal gradient technology that allows the optimization of the reaction in a single run. Gradient range between 30 and 100°C.

Applications and uses:

- Nucleic acid amplification (PCR)
- Gene cloning and analysis
- Gene expression analysis
- Mutational analysis
- Cycle sequencing
